• Governor Phil Murph signed Executive Order No. 283 on January 19, 2022, requiring covered workers at health care facilities and high-risk congregate settings to be up to date with their COVID-19 vaccinations, including having received a booster dose. All covered workers will be required to be vaccinated by the dates outlined in the Order and will no longer be permitted to submit to testing as an alternative to vaccination, except to provide accommodation for individuals exempt from vaccination as outlined in the covered settings vaccination policy. This requirement aims to strengthen protections against the spread of COVID-19 and the highly transmissible Omicron variant to vulnerable populations across the state. Healthcare facilities’ covered workers subject to the Biden Administration’s vaccine mandate for health care settings will have until January 27, 2022, to obtain their first dose of the primary series of a COVID-19 vaccination and submit proof that they are up to date with their vaccination by February 28, 2022, which includes having completed their primary series and any booster shots for which they are eligible. This timeline is consistent with the Biden Administration’s federal vaccine mandate for health care settings.

Health Care facilities’ covered workers not subject to the Biden Administration’s vaccine mandate for health care settings and high-risk congregate care covered workers will have until February 28, and March 30 deadlines will be required to submit proof of their booster shot within three weeks of becoming eligible. Executive Order No. 283 also requires that covered workers currently subject to testing under Executive Order No 252 must continue once to twice weekly testing until they provide adequate proof that they are up to date with their vaccinations based on the respective February 28 and March 30 deadlines. Additionally, the Order requires covered settings to have a disciplinary process for noncompliance, including and up to termination of employment. This Order will not impact a setting’s ability to impose more stringent vaccination or testing requirements on workers, including requiring more frequent testing.

The group also discussed the impact of the latest vaccine mandate for the congregate settings on agency operations. Some employees of the organizations have expressed frustration over the additional expectations that the mandate brought. Some employees are vaccinated, some resigned, and others are waiting to see what will happen as the vaccine deadline approaches in the next couple of weeks.

Why is it a “team”? Police officers, mental health professionals, and advocates receive intensive training as a group to respond to citizens experiencing a behavioral crisis and learn how to work together to achieve the best outcome for the individual. The emphasis in training is to provide knowledge about the wide variety of mental health issues and address them, crisis resolution skills, and access to community-based services.

The CIT Training for Morris County will be held at the Morris County Public Safety Academy located at 500 West Hanover Road, Parsippany, NJ 07054, from 8:00 am-4:30 pm on the following dates in 2022:
