What will your participation in this program do for you?

This program provides grant funding to assist agricultural producers and rural businesses who want to implement renewable energy projects. Through your participation in this program, you will receive **at no cost to you...**

- ✓ Education about different types of renewable energy. And renewable energy options for your farm or rural business
- ✓ A customized **Resource Assessment** for your farm or business analyzing your site to determine what type of renewable energy is best for you and how much renewable energy you can expect to generate
- ✓ Assistance in identifying up to three renewable energy projects which are right for your farm or business site, along with advice on selecting the project that will have the best outcome for you
- ✓ A **Project Economic Assessment** of how much your selected project will cost, how much your energy costs should be reduced, and how much income can be earned if your selected project is installed at your site
- ✓ Information about **Net Metering**, what it is, how it relates to your renewable energy project, and what it means to your financial bottom line
- ✓ Information about how to get funding to install your renewable energy project through the USDA Rural Development Renewable Energy for America Project, referred to as REAP
