Percentages less than 1/10th of 1 percent (0.1%) display as 0.0% due to rounding.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error, which may be relatively large for smaller geographies and population sub-groups. In addition to sampling variability, the ACS estimates are subject to nonsampling error.
