Notes:
The right-of-way widths shown on the Official County Map do not in each instance reflect presently existing widths, but do indicate the width of right-of-way required for each road. In areas that are heavily built up with buildings close to the street on narrower rights-of-way, the right-of-way width shown on the Official County Map shall be realized when development or redevelopment takes place.

Along the frontages of certain developed sites and at certain road intersections, rights-of-way may in fact be wider than indicated on the Official County Map. This occurs where provision was made for additional traffic lanes for site access or turning movements. These wider rights-of-way occur infrequently for relatively short distances.
