NEW CONSTRUCTION RESIDENTIAL SALES 2019 SUMMARY UPDATE

Introduction

This summary provides new home sales data for 2019 and updates the New Construction Residential Sales 2003-2010 report and subsequent update reports provided for the years 2011 to 2018. This information was obtained from the New Jersey Department of Community Affairs, which compiles data on new home warranties and includes the price paid for newly constructed, for-sale housing units, by type of unit sold. The data includes records of <u>first time sales of newly constructed for-sale dwellings</u> for which a new warranty has been issued. Data related to new rental construction is also addressed in this report.

New Units Sold – All Types

In 2019, there were 409 new residential units sold, a decrease of 13.5% from 2018.⁴ Yearly sales of new residential units since 2003 are illustrated in Exhibit 1.

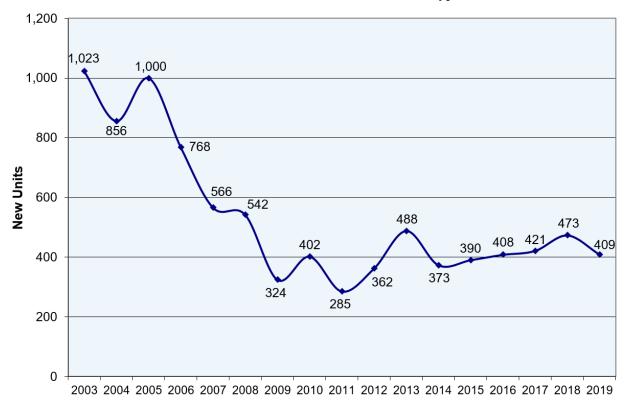

Exhibit 1 – New Construction Residential Sales – All Types 2003-2019

New Units Sold Between 2018 and 2019 by Type

Sales of new single-family detached units increased by 8.0% between 2018 and 2019. Conversely, sales of new single-family attached (townhomes and duplexes) and multi-family units decreased by 27.5% and 28.6%, respectively, during the same period.

As a percentage of all new units sold, between 2018 and 2019 single-family detached units increased from 39.5% to 49.4%, single-family attached units decreased from 56.0% to 46.9% and new multi-family units decreased from 4.4% to 3.7%. As illustrated later in this report, while <u>sales</u> of multi-family for sale units have fallen in recent years, multi-family <u>rental</u> units approved by the Morris County Planning Board have been a significant factor in residential development.

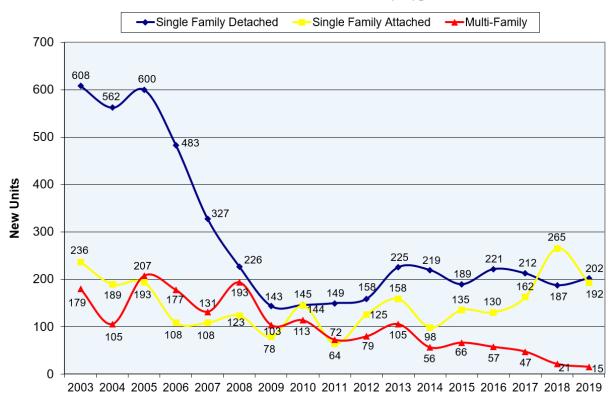

Additional detail regarding data from 2011 through 2018 are included in the New Construction Residential Sales Summary Updates for 2011 through 2018, located at https://planning.morriscountynj.gov.

² NJDCA compiles data from home warranty companies and identifies units as single-family detached, single family attached (townhomes), duplexes, 3 or 4 unit dwellings and dwellings with 5 or more units. This study combines duplexes with single family attached while 3 or 4 unit dwellings are combined with multi-family. NJDCA data was also reviewed by the Morris County Office of Planning and Preservation to confirm its accuracy. County real property tax records determined housing size (square feet of livable area). Data on housing unit size was obtained directly from municipalities when required.

³ New dwellings built directly by homeowners are not included as no home warranty is required. New dwellings <u>built as rentals are not included</u> in the NJDCA data. Unless otherwise noted, <u>all data references "for-sale" units.</u>

⁴ 30 units were removed from the total for 2018 because they were deed restricted affordable rentals owned by a management company.

Exhibit 2 – Sales of New Residential Units by Type 2003-2019

During the 2003 to 2019 study period, 9,090 newly constructed residential units were sold. Of these, 53.4% were single-family detached, 27.6% were single-family attached and 19.0% were multi-family.

Location of New Unit Sales 2019

- While new single-family detached sales are typically distributed throughout Morris County, in 2019 just three communities represented 44.1% of this type. For the eighth year in a row, Mount Olive led sales in the single-family detached category with 44 units sold, 40 of which were from the age-restricted Regency at Flanders development. Chatham Township followed with 24 units and Florham Park with 21 units.
- Just three projects represented 81.8% of the newly constructed single-family attached units sold in 2019: the Residences at Columbia Park townhomes in Morris Township (102 units), the Hills by Lennar townhomes in Rockaway Township (29 units), and the Mountain Ridge townhomes in Mount Olive (26 units).
- All of the new multi-family units sold in 2019 were from just one project, the Madison Place condominiums in Madison, with 15 units. As all development in this category comes from one project in one municipality, year over year change during this period should not be used to suggest long-term trends related to this housing type.

Tables 6 and 7 detail price variation by type and cost category.

⁵ The median is the value in the distribution of all records ranked from low to high, above and below which are an equal number of records, i.e., the middle value.

⁶ This analysis of unit size divides records into three price categories (Lower Priced, Medium Priced and Higher Priced) in which all records for a given type and year are divided into three equal categories and the median for each category is identified The median price of the Medium Priced category equals the median price overall

New Rental Residential Construction

The data presented thus far includes only for-sale units for which a warranty has been issued. However, new *rental* housing is making up an increasingly substantial portion of housing construction in Morris County. To assess this activity, an analysis of development review records from the Morris County Planning Board was conducted.¹⁵

The Morris County Planning Board approved development applications that included 6,785 rental units in 73 projects between 2003 and 2018. Age restricted units represented 1,228 (18.1%) of these units. In 2019, six applications that included 881 rental units were approved, of which 41 (4.7%) were age restricted. By comparison, only 409 units of new *for-sale* housing were sold in 2019.

The largest rental development approved in 2019 was the proposed 325-unit project known as The Morrison on Cherry Hill Road in Parsippany. Since then, the pace of rental approvals has increased, with 10 projects including 1,534 rental units approved during the first nine months of 2020, of which the largest approved rental development was the proposed 441-unit mixed-use project known as The District at 1515 on State Route 10 in Parsippany. Both of these Parsippany developments are subject to affordable housing set-asides.

Details concerning each individual project approved between 2003 and September of 2020 are provided in Appendix 3.17

¹⁵ Projects not fronting on a county road or for which there was less than one acre of impervious cover are exempt from county review and are not included in this data; therefore additional units may have been constructed based on local approvals. This analysis also does not include additional rental units that may have been approved and constructed through conversion of existing structures. Projects approved, but known to have been withdrawn or denied at the local level, are also not included. Housing tenure and age restriction status of projects is subject to change subsequent to county approval without notice to the county.

 $^{^{16}}$ As shown by Table 1, a total of 9,090 newly constructed units were sold from 2003 to 2019.

¹⁷ As 2020 data for major rentals approved by the Morris County Planning Board became available, it has been included in this analysis. Final NJDCA warranty data concerning units sold in 2020 are not currently available.

¹⁸ Figures may include non-independent living nursing facility bedrooms.

Summary of Findings

- A total of 409 newly constructed housing units were sold in Morris County in 2019, a decrease of 13.5% from 2018. This represents the first decrease in new units sold since 2014.
- Sales of new single-family detached homes increased by 8.0% in 2019. Sales of this type have been relatively stable, numerically, since 2013. They now represent 49.4% of new unit sales compared to the 53.4% they represented during the entire 2003-2019 study period.
- In 2019, 38.1% of the 202 new single-family detached home sales were teardowns and rebuilds. During the 2012 to 2019 study period, the total number of new construction sales generated by teardown/rebuilds was 36.2%, with the peak year of this phenomenon being 2017 (42.9%). The continuation of this activity likely reflects the diminishing supply of vacant developable land, high land costs and a strong economy. Since many of the newly constructed single-family detached homes identified in this report are replacements of teardowns, the net increase in the overall supply of such homes is actually less than the number of "new" home sales reported. Taking into account the number of new single-family homes sold in 2019 that replaced previously existing single family homes, the **net** amount of total new single-family homes added to the housing supply was 125, despite 202 such units being sold in that year.
- Although new single-family attached homes dropped by 27.5% in 2019, with 192 new units, this housing type made up nearly 47% of all newly constructed home sales in 2019, significantly higher than the 27.6% this housing type represented during the overall 2003-2019 study period.
- Sales of new multi-family units dropped by 28.6% in 2019 to 3.7% of all new unit sales, and for the second year in a row has set a record low, both numerically (15) and as a proportion during the 2003-2019 study period, and significantly below the 19.0% it has represented during the period overall. The small percentage of all new unit sales for this type of housing is likely more a reflection of desired tenure and not type, since multi-family rental approvals have been substantial in recent years.
- The median price for all housing types combined increased by 12.3% in 2019 to reach a 2003-2019 study period record high of \$720,000.
- The median price for new single-family detached and single-family attached units sold in 2019 increased by 8.0% and 6.0% respectively.
- The median sales price for new multi-family units decreased by 16.0% in 2019 to \$789,000, but this followed a record high in 2018. Despite this decline in median price, the \$789,000 figure is still more than twice the median price for nearly every other year during the 2003-2019 study period. With only 15 new units of this type sold in 2019, all from a single luxury condominium development, very little can be concluded about long-term pricing trends based on this information.²⁰
- The median size for new single-family detached units sold in 2019 decreased by 2.1%, while the median size for single-family attached and multi-family units increased by 13.5% and 3.8% respectively.
- Although sales of new single-family detached units are typically distributed amongst many municipalities, this is the third
 year in a row that they were more concentrated than usual. As always, sales of the other types were concentrated in just a few
 communities. In 2019, all of the multi-family for-sale units were generated by just one project.
- The pace of Morris County Planning Board rental approvals remained strong in 2019 and intensified during the first nine months of 2020. Rental development activity is expected to remain strong in the future due to affordable housing settlement agreements, high for-sale housing prices and continued market demand.

²⁰ The 15 units were from the Madison Place condominiums in Madison, which, combined with the 19 units sold in 2018, represents the entirety of this 34-unit development.

¹⁹ Teardown/rebuild data first compiled in 2012. Based on a Morris County Office of Planning and Preservation review of aerial photography.

• A total of 775 housing units of all types were authorized by building permits in Morris County in 2019, contributing to the significant overall housing development likely to be seen in the near future.²¹ Building permit data may be further reviewed at https://planning.morriscountynj.gov/data
