Boonton Ironworks

2021 \$33,600 Preservation Plan

Grant Recipient: Boonton Town

Location: Boonton Town

The Boonton Ironworks was built in 1830 and was largely responsible for the existence of the Town of Boonton. A large rolling mill produced iron products which were shipped via the Morris Canal to Elizabeth and Jersey City.

The 2021 grant is providing for the completion of a Preservation Plan including recommendations for preservation, an interpretive plan, and an archaeological assessment.
